"The Blockchain breaks Orwell's Dictum."

Julian Assange

"Who controls the past controls the future: who controls the present controls the past,"

George Orwell, Nineteen Eighty-Four

A Chairde,

Muintir na hÉireann, tá muid agus an domhain go léir faoi ionsaí. If you were wondering why the World had become so bizarre, this letter contains the explanation and should be shared around the island and online at once.

"For we are opposed around the World by a monolithic and ruthless conspiracy that relies primarily on covert means for expanding its sphere of influence--on infiltration instead of invasion, on subversion instead of elections, on intimidation instead of free choice, on guerrillas by night instead of armies by day."

John F. Kennedy, April 27th , 1981

This letter has been printed with the Calibri font for optimal scanning results. Links & BitCoin transactions are annotated with numbers [Link/TX #] and are listed in the Appendix as evidence.

When Julian Assange the Chief Editor of Wikileaks proclaimed that his next release would lead to the arrest of Hillary Clinton it was reported Worldwide that his internet had been disconnected at the Ecuadorian Embassy in London on the week ending the 16th of October, 2016. What was not reported was that his dead man's switch had been triggered releasing the information to decrypt over Five Hundred GigaBytes of encrypted 'Insurance Files' [Links 1&2] Wikileaks had released for this exact purpose (his silencing) documenting the most heinous crimes against Humanity **and it's littlest ones imaginable.**

The beyond-disgraceful Zionist child abuse blackmail system [**Revelation 2:9**] had been exposed naked for the whole world to see. It is the cause of all of Israel's wars in the Middle East, the rapid acceleration of wealth inequality, the centralisation of power and the subsequent social and cultural deterioration of the World. The money printing World Banker's secondary method of control over the corrupt politicians, royal families, journalists, the entertainment, media and tech industries and even academia itself is evil personified but very shortly their reign will be over and **ALL** of them and their underlings will be brought to account.

On the 16th of October, after a last minute trip to London by John Kerry [Link #3] and a **completely incredible** visit to the Ecuadorian embassy in London by actress Pamela Anderson [Link #4]; Three curious tweets [Links #5,6,7] were published by the Wikileaks Twitter account.

Roughly simultaneously the full Wikileaks website map became public for the first time revealing all of their website's files for the first time. They had been incorrectly time-stamped "01-Jan-1984" [Link #8] referencing the scene in Orwell's 1984 where the main character is brought into "Room 101" for interrogation. The Wikileaks website also displayed the message "*Wikileaks insurance file may have just been released*" for a very short amount of time. Alarm bells rang all around the World with many correctly assuming the worst.

Disguised as insurance file "pre-committment hashes" (a method for downloaders to verify that they had received the correct and uncorrupted insurance file) the three tweets, upon closer inspection, contained **reversed** BitCoin private keys which, when utilised, revealed custom vanity BitCoin addresses containing the encoded words "**Keys**", "**hell**" & "**Fatal**" indicating that the instructions to decrypt their *previously released* insurance files had been embedded in the BitCoin Blockchain.

Assange's dead mans switch was a stroke of genius as the BitCoin Blockchain is weaved by cryptographically securing itself self-referentially using calculated values of the data it contains. Chains of transactions are interwoven between chains of blocks with every block and transaction's identifying value dependent on all the previously calculated values in the chain itself. This means that if you change even just a single bit of the data in the chain, a '1' to a '0' or the opposite, everything after that point is corrupted and it ceases to function.

Information (text files, pdfs, images etc) can be embedded into the blockchain and since it's control is decentralised and protected by huge financial interests; Editing it to remove such data is effectively impossible. Furthermore the longer any information that has been inserted into the chain remains there, the amount of computing power necessary to remove it grows exponentially.

It is the perfect and only place to put censor-resistant information.

Quite obviously those vanity BitCoin address keys never matched the subsequent insurance files that were released [Link #9].

Eventually the rogue agents now in control ("Wikileaks") pathetically attempted to explain that the file identifiers were published in order to verify the files once they had been decrypted; A ridiculous deviation from their normal and any secure release procedure as of course nobody could verify what they had downloaded in the first place.

Subsequently, after Assange's "internet had been cut off" and the dead man's switch tweets were sent off, on the 20th and 21st of October, Wikileaks made a string of five further tweets containing spelling errors, a complete novelty given Wikileaks' previous professional track record. The errors, when combined in sequential order, inarguably revealed another encoded message: **'Help Him'**.

Wikileaks' supporters, hackers and freedom fighters around the world began looking for and spreading the information necessary to find the insurance file decryption instructions in the blockchain. Simultaneously the corrupt politicians and heads of state, the most evil satan worshipping child murdering and abusing scum of the World began sweating [Link #10]. The internet witnessed the largest blackout and DDOS in history [Link #11] and the blockchain memory pool was flooded with transactions driving the price to embed data sky high. Prince Philip eventually stepped back from public duty [Link #12].

The real insurance files and their identifying hashes were packaged and shared in the following torrent magnet link for the final time:

Exactly one month (16th November 2016) after the switch was triggered someone posted the proof of existence and integrity of each insurance file's individual torrents on pastebin [Link #13]. They had embedded it into the blockchain on the very same day as the 3 tweets and notified the World of this a month later.

We have everything covered; There is no disputing the source or validity of the insurance files.

Meanwhile, the few internet users (aware of what was going on) searched for information and found it on the imageboards and chat sites [Links #14,15,16].

Parsing the blockchain for all wikileaks associated text people quickly found Wikileaks had embedded their most famous leak known as 'Cablegate' (the entire encrypted file, unredacted, password:ACollectionOfDiplomaticHistorySince_1966_ToThe_PresentDay#) [TX #1] followed by several encrypted gpg files and base64 encoded OpenSSL files. It is in these files that they had hidden the instructions to unlock the much larger insurance files. Also found in the chain was a computer program to extract those very same files [TX #2].

Meanwhile, citizen investigators had found lots of FBI accredited code words for child pornography ("cheese pizza") and child sacrifice in the publicly released Hillary Clinton & her campaign manager, John Podesta's email leaks. It centered around a small pizza parlour in Washington D.C. customers of which included Clinton herself, Barak Obama, George Soros and others. People were quick to find the owner in a Rothschild family photo, and his boyfriend David Brock had numerous social media posts with Lynn Forester DeRothschild. E-fits of the Portugese's main suspects in the Madeleine McCann case matched Mr. Podesta & his brother remarkably. The investigation was named 'Pizzagate'.

Much like how the mainstream media popularised the term "Conspiracy Theory" after the assassination of John F. Kennedy; They started heavily pushing a previously uncommon term "Fake News" (now falsely attributed to Donald Trump who began to use it to **wake** people **up**). The social media companies Facebook, Twitter, Reddit and others also, began censoring information that was being unearthed. They, the media and their tech industry colluders, were attempting to whitewash the purported "conspiracy theory", covering up the satanic child abuse ring.

Someone claiming to be a wikileaks staff member who was raided when "Julian's internet was cut" made a string of intelligence drops on the imageboard formally known as 8ch.net (or '8chan') [Link #17]. Including but not limited to:

- *Julian is missing as are most of the WikiLeaks personnel that I had regular communications with.*
- *WikiLeaks personnel are NOT in control of the official Twitter account.*
- *We have proof of child exploitation of children in Haiti and the U.K. by the Clinton Foundation.*
- *Child exploitation in EVERY COUNTRY is run by the same people at the top.*
- *There is a silent war that's been raging in the U.S. **since 2001** between various intelligence agencies.*
- *If there was any question about Julian's safety, he would immediately appear at the balcony window to the public.*

More intel on the specifics of the contents of the insurance files and the fallout of the dead man's switch activating was dropped into another research thread [Link #18]:

- *Hillary Clinton was part of a Thelema cell. If you read their teachings, their highest level rituals... involve raping six year old boys, sodomizing them and then murdering and eating them.*
- *This was a cult setup by British intelligence.*
- *If wikileaks had released the whole (Clinton & Podesta) email set, there would not be any ambiguity. There would be no question about what these people are doing to children and what their beliefs are.*
- *They are going to be put in a front of a firing squad or lynched from street lamps by the public when it comes out what they have been doing to children.*
- *The public (is) not prepared to understand or accept who is running their governments. They need to be eased into it, incrementally and need to follow the breadcrumbs themselves and come to the conclusions themselves. If you threw the whole truth at them, they would reject it because it is too absurd for them to accept at once.*
- ***The pedophiles and their enablers are going to be flushed out as they try increasingly desperate censorship and psychological operation measures to keep the public ignorant.***
- *They are the British Empire.*
- *They believe they are genetically superior and that is where their right to rule comes from.*
- *The Rich set up these "Rituals" for their amusement, to see how fucked up people are and how far they would go for the promise of wealth and power.*
- ***You are doing the right thing. The truth will come out.***

As I was gathering information on a Bitmessage channel (remnants of which can be found archived [Link #19]) around about this time the pedophile-satanists made their biggest mistake. A photograph of an abused boy no older than 2 or 3 years old was sent to a public BitMessage channel where I was gathering information. The boy resembled myself so much that I had to double take to ensure that it wasn't. Frankly it didn't even matter at that point, the damage had been done.

I felt like all I could do was shout about it online, and I did, as loudly as possible. It wasn't the smartest thing to do in retrospect as I became a target. My family home was quietly broken into one Saturday or Sunday morning (likely March the 11th, 2017). I bounded downstairs after the dog started barking to find the door perfectly ajar enticing me out the front where I found a man who doubled back towards me after I shouted at him. I quickly shut the door before he could get too close. My car was then stolen and used in an **armed** robbery in Spar in Ashtown, Dublin according to the Garda who arrived a few hours later and the next night they came back and took the other one. Neither car was ever recovered, nor were they worth much (<1000 Euro combined), even for crime. The message was clear: We are armed and dangerous, stop investigating.

After all of this happened, Leo Varadkar allowed the British Intelligence agency MI6 to setup in the country [Link #20]. I later traced a curious IP packet leaving my computer to Ballymore Eustace, the last stronghold of the British in the Pale (Dublin area) [Link #21]. The rogue intelligence agencies had infiltrated my computer and scrubbed one of the most straightforward solutions from my copy of the blockchain [Links #22,23]: "*Fools rush in where angels fear to tread.*"

John Brennan the ex-head of the C.I.A. had already visited the country by this stage stating "we've made mistakes... some of them bad mistakes" [Link #24]. To make things worse, the government proposed incorporating an 'Irish CIA'-type intelligence agency [Link #25]. Brennan wasn't the only high profile visitor to the island of Ireland with the curiously anti-Wikileaks British and Swedish royal heads of state visiting Ireland an abnormal amount of times since, inadvertently giving their public more than enough evidence to wake up to their pedo-satanist zionist occupations. So too was Hillary Clinton herself here.

After gifting the Garda Commisioner Role to an ex-MI5 ally [Link #26], Mr. Varadkar then allowed a Canadian NGO [Link #27](purportedly linked to one of the child abuse network's inner circle, George Soros, an established large donor to the Pro-Abortion side), to enter the country as an apparant Abortion referendum "observing" task force. Were they observing the referendum or conducting a fraudulent result?

Varadkar was then interviewed by Caitríona Perry on RTE 1 on the final primetime news before the 24 hour reporting embargo on the referendum. She asked him if the Supreme Court's judgement was correct in asserting that the only rights the unborn had in the Irish Constitution was the right to life. Varadkar, the most disgraceful leader of Ireland, disagreed seemingly over-ruling the Supreme Court. According to him the unborn were also protected by the clause in the Constitution citing the common good. This despicable act of clear treason was underlined when his government then, contrary to their proclamation, refused to administer pain killers to the youth and future of Ireland they had sentenced to death.

Chat logs shared to me on Bitmessage revealed some helpful clues on how to get access to the insurance files:

Someone had been uploading torrent file magnet links in plaintext to the blockchain and in fact, had covertly inserted the instructions to decrypt some of the files directly into it also:

[TX #3]: OP_RETURN: EW blocktagram: **Save magnet links and hash of file + donation address**

[TX #4]: OP_RETURN: EW app idea: **Save magnet links and hash of file + donation address**

What they seemed to be saying was to save the magnet link into a .txt file and created a file identifying hash (SHA256 standard) of it and add the donation address contained in the magnet link into the hash function. And that's exactly how it turned out; By using the ascii magnet link embedded in the blockchain transactions [TX #5 through the chain to TX #6]

The sha256sum of that magnet link is (taking care to preserve proper indentation and total lines=7): sha256sum magnetlink.txt:

```
47aa4cbfdde9b26873649186c20191f4152f80da2218838cc17e6a68d039378c
```

And when you concatenated that hash with the donation address contained in the magnet link and calculate a further hash as follows:

```
sha256sum magnetlinkSHA256andAddress.txt
(47aa4cbfdde9b26873649186c20191f4152f80da2218838cc17e6a68d039378c1HMeBV8xxEPkZG7fjMtFXjveCyB7K8wsZi): 9375de2bea1ef61bcf14394105afdd0246425361f06e61380ce4db78b1bc1150
```

This gave us the password to decrypt the .aes file embedded in base64 [TX #7]:

```
openssl enc -d -camellia-256-cbc -md MD5 -in tx7.aes -out tx7.decrypted -k
9375de2bea1ef61bcf14394105afdd0246425361f06e61380ce4db78b1bc1150
```

Crucially, the resulting binary file allowed us to use itself as a password/key to decrypt the first Wikileaks connected file: file4.gpg [TX #8] (which has been embedded using a technique called 'P2FPKH', or Pay-to-Fake-Public-Key-Hash):

```
gpg -d -o file4.decrypted -passphrase-file tx7.decrypted file4.gpg
```

Another encrypted .aes file [TX #8] was decrypted using another magnet file sha256sum, a Coldplay album (starting in [TX #9]), without the final step of adding the 'donation address':

```
openssl enc -d -camellia-128-cbc -md MD5 -in tx8 -out tx8.decrypted -k
08d788b33ffb9c033456201a0bd95f79bcbfbed62ad2006cae8f02b4bf42ee667
```

The decrypted file could again be used to open file4.gpg as above, but another way to open file4.gpg gave way to the rest, a simple 256 bit, 64 hex password (much like the 3 dead mans switch tweets) contained in [TX #10] also opened the file as follows:

```
gpg -d -o file4.gpg.decrypted -passphrase
60ddbd0df3246dd5542a1076b2b9ed7db35e388e7e8bf6bd83250a2117dd6c75 file4.gpg
```

```

Most of the other P2FPKH/P2FMS encrypted files (file1/3/5.gpg from [TXs #11,12,13]) could also be opened with a 64 character hex string contained in links embedded in [TXs #14,15,16]:

```
gpg -d -o file1.gpg.decrypted -passphrase
2af14ef19220d275b0f87907f4ab5075dc9b75b574ef8c2e06e32e8311776945 file1.gpg

```

I never opened file2.gpg [TX #17] but a document containing a search of the blockchain hosted on what is known as an Etherpad appeared titled the 'Annotated Blockchain' on an MIT server [Link #28]. It was constantly attacked and edited with any of the above or a full solution never to see the light of day on the internet. Some people attempted to help by dedicating a full pad highlighting the magnet link transactions [Link #29].

Assange wasn't seen live in person until they finally rolled "him" out in a live video Reddit AMA [Link #30]. "He" talked at length about nothing particularly important and never explained a single thing about the various questionable events that had occurred since October, where he had been for almost three full months or what happened to the upcoming release on Hillary Clinton.

People were losing their minds in the Youtube chat. All the good guys knew the only way they could prove if he was still alive (and who he was claiming to be) was if he cryptographically signed something with the private key of his "*proof-of-life*" **High Security PGP Key Pair** [Link #31] (to be checked against the corresponding public part [Link #32]) for bullet-proof verification. Any Computer Scientist in the World will confirm that if software is released without a cryptographic signature that it should not be trusted. However in this case, it was not software but a human.

After about an hour he finally addressed the elephant in the room. He rolled back on his own impeccably designed protocol deeming it inadequate as producing the key would not prove it was him, it would just prove that he had the key. This completely rendered the entire existence of the High Security Key useless. **This man could not prove he had the key OR that he was Julian Assange.**

Foolian Assange later emerged onto the embassy balcony on March the 13th 2017, for the first time in public (not on video) in 6 months; "He is a double." was tweeted out by a Twitter user @TuringThe2nd [Link #33] who had joined Twitter in Oct. 2016 and who's early blockchain search posts had been shared during the online hunt. They had nearly seven years to find a suitable double to modify for this exact purpose; to dissuade people from attempting to open the insurance files. It doesn't even matter if he was or is a double at this point because the contents of the files had been released to the public and **nothing can stop what is coming.**

Unfortunately only the OpenSSL files and file4.gpg can be decrypted today using mainstream processors **as far as I am aware**. Assange never envisioned all the manufacturers like Intel & AMD to collude and intentionally misconfigure their processors to obstruct the public from finding out the truth about those that rule over them (Spectre, Heart Attack/Bleed etc). Intel named one of their **many vulnerabilities** (backdoors) "*Spoiler*" and stated that some of the problems they needed to mitigate lay in hardware logic surrounding AES & GPG encryption [Links #34, 35].

Neither did Assange realise that the entire BitCoin developer team would be corrupted and destroy the protocol which allowed him to perform this miracle in the first place. It has been corrupted twice now. First they crippled the (BTC) protocol by introducing a feature which severs the link between the spender and receiver (auditability) whilst simultaneously choking it's throughput. This drove up the cost to transact and thus our ability to spread important information cheaply. The second time they corrupted the newly maintained chain (BCH) by reordering transactions alphabetically every block rendering it's inspection increasingly difficult amongst other disadvantages.

The original vision and protocol now only lives on in Bitcoin Satoshi's Vision (BSV). Craig Wright (a fellow Australian like Assange) is behind BSV. He proved himself to be Satoshi Nakamoto, the inventor of Bitcoin, to early Bitcoin developer Gavin Andresen years ago and is the man who owns the U.S. copyright to the invention. Even more indicative of his expertise is that his company nChain also own the most amount of patents globally in the blockchain space.

Dr. Wright alluded to this story in his recent ongoing court case [Link #36] that he worked with an informer for the U.S. Government who should not be named in the proceedings (perfectly filling in the redacted blanks using the same font starting on the second page: '**Julian Assange**', '**Mr. Assange's**', '**him**', and later in the document "codename" '**Mendax**') and if not redacted would "implicate national security concerns" & "almost instantly be breathlessly reported on and circulated worldwide." Furthermore, Dr. Wright "**testified that he does not know if that individual is still alive**".

BSV has since been delisted by most of the exchanges because of the inherit value it is destined to give the World will put them out of business as there objectively exists no competition worthwhile to exchange for it and the market is about to find this out. So too will the exchanges when fraud litigation against them for selling something that is not Bitcoin begins.

Every single story about Julian Assange since October 2016 has been concocted to brainwash the public into disbelieving the truth of these events.

From the fake Twitter account with which they impersonated his Mother [Link #37 vs 38], to the actors claiming to be his extended family and even most recently a supposed partner of Assange who was bearing a child of his at the same time he was reportedly seeing Pamela Anderson in October 2016, **everything is a lie**.

Wikileaks's weak-link, Jacob Applebaum is a traitor to Humanity due to his bare-faced lies about the fate of Assange but the safety of Wikileaks Deputy Editor Sarah Harrison is in grave doubt. She alluded to the huge propaganda surrounding this story when she was wheeled out to the public alongside Pamela Anderson the last time I saw her alive (this is included in the video attached to this letter).

On June the 4th 2017 I shared a .zip file with an American streamer who was investigating Pizzagate and brushing shoulders with Mossad agents. The file accompanies the video I include with this letter and it contains an archive of all the helpful information of the dead mans switch gathered in the immediate aftermath (including a meme .jpg image of a dog containing a stegonagraphically embedded in reverse gpg file with a damaged header [TX #18]).

What occurred to the streamer next was startling; After posting one of Assange's decryption keys directly onto the clearweb much later that night his housemate came home in a state never before seen and completely destroyed his computer. By all accounts it sounded very much like someone had put him up to it.

You wouldn't believe half of the other things that occurred during all of this including several attempts on my life, appearances by black-hat Hollywood celebrities, three entire airports were grounded [Links #39,40,41] and we had physical American Military boots on the ground [Link # 42] They are likely why I am still alive.

It was stressful to say the very least so in the early morning of 10th of January 2019 I drove down to Shannon from Dublin and purchased last minute flights to New York at the desk in the airport. After passing through security I was then promptly refused entry to the United States. They took me in for a Federal Statement so I decided to take my chance and give them the details in case I didn't survive for much longer (U.S. Department of Home Security File Number: A079 234 719):

Purpose of trip? *Whistle blowing. I wanted to report what I know to Government officials. To disclose information on a child abuse blackmail network throughout the Western countries. And the assassination of Julian Assange and his deadmans switch in the Bitcoin Block Chain*

Who did you plan to make the disclosure to? *The U.S. Military.*

Fortunately though, and this is where things become even more interesting, after Donald Trump stated *"This is the calm before the storm"* in front of room full of Army Generals [Link #43] a large scale U.S. Military led info-leaking operation had began known only as Q or 'Q Anon'. The establishment continues to attack this operation with full force, only because they know their time is running out. Q had already alluded to this story when they made a cryptic post leaving the user to read between the lines:

"Russia Russia Russia??

Real or Fake?

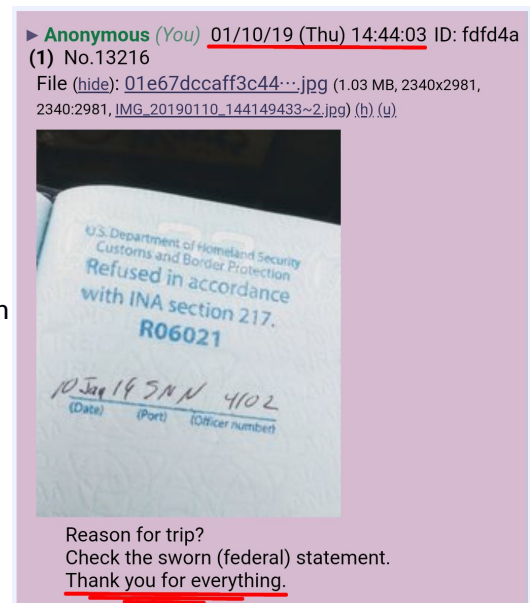

JA?"

(Julian Assange) [Link #44]

After I was led out of Shannon airport security I quickly notified Q what I had done with a post and photograph of my passport on 8ch.net (now disappeared) ->

Q, who hadn't posted in 4 days at the time registered the deed the next morning in a post *"BOOM! BOOM! BOOM! BOOM!"* and 17 minutes later explained themselves somewhat *"Public access to Intel?"*

[Links #45,46]

They continued to clean up behind the scenes and I just hung my boots up. Several months passed until I needed to visit the U.S. embassy in Dublin to get a visa for a wedding. I stupidly used my real e-mail address to book the appointment on the 4th April 2019 for the 15th which alerted the British to what could happen and gave them 11 days to prepare. They sprung to work incredibly quickly but met some pushback.

"Wikileaks" reported on Twitter that Assange was to be ejected from the embassy according to a "source" in the Ecuadorian Government, something which Ecuador heavily denied the next day in an official statement labelling the story "fake news" [Links #47,48,49]. Then (likely for the large IMF loan which had been recently gifted to him) Ecuador's president Lenin Moreno released a statement contradicting his own officials [Link #50].

This led to the ex-President of Ecuador, the honourable Rafael Correa, to quickly denounce this action labelling the incumbent as the '*Greatest traitor in Ecuadorian history*' [Link #51] as Correa knew Moreno was helping to proliferate this farce.

It was even reported that Assange was smearing his own feces on the walls of the embassy, in between the near 50 year old's indoor skateboarding sessions [Links #52,53]. It was one ludicrously unbelievable story after the next, a disgraceful smear campaign of the deceased, a man who had curbed needless wars and helped jail corrupt bankers, in every aspect.

Tell a big lie and keep repeating it as the saying goes.

They eventually carted "him" off on the 11th of April 2019, with the double hilariously shouting disapproval of the "Trump regime" (sic) who in actuality hadn't initiated anything despite fake news reports and were working on the exact opposite: to complete Assange's mission exposing this evil for the betterment of the World.

I went on a 3 day bender after this stunt before my embassy appointment. During which I wondered just how much surveillance I was under. Obviously I was not using any device with a camera or microphone at that time but I thought it would be a good idea to check if the enemy were bothered trying to hack into my friends phones to monitor my activities. The only way I could know for sure was to say some disgraceful things to give them ammunition to smear me with and so I did.

I put on a show embodying the most politically incorrect areas of the internet. It was entertaining for a while playing the villain but when I woke up I knew I had done immense damage. When I got to the embassy I went through the normal procedure and was refused entry again. It was back to the drawing board for a while. †

The British people are going to take their establishments heads off. Their warmongering lying Zionist media and their hellbound paedophile politicians (and higher), are apart of and behind this blackmail cult covering up for the abductors and abusers of Madeleine McCann and much more.

This is cause for great embarrassment for our neighbours, it is time for them to establish a proper Republic. They ought to take on Michael Collins' and the early IRA's tactics, as the young man in the Collin's film says: "*May the Lord have mercy on your soul.*"

"The Irish are brutal enemies." - perhaps it is this that Donald Trump was alluding to?

This evil manifests itself in Ireland today with treasonous politicians selling our land and housing off during a manufactured housing crisis at knock down prices not offered to the Irish owners to investment bankers in tranches of thousands. A near open border immigration policy which drives wages down and thus emigration out is destroying the common social fabric that binds us, our heritage, and they continue to accelerate this Marxist attack against the larger Irish family unit.

We have a second childrens minister in a row who has chosen a sexuality that explicitly disallows them from procreation. He is now fixated on easing the path for young Irish boys to begin down a route towards surgically removing their genitalia without their parents consent and harbours public support for a disgraced British Paedophile.

The previous childrens minister (an open feminist/thelemic occultist) put into motion the mandating of compulsory sex education for all our children being sought by the globalist United Nations and their guidelines. Those guidelines include teaching masturbation to children as young as 3 years old. There are also child abusing scumbags in our Judiciary.

As Vladimir Putin and Bashar Al Assad celebrate the conclusion of the Israeli war against Syria by building a massive Christian Cathedral, our government are ordering the removal of Crucifixes from our hospitals and schools and allowing large Mosques preaching a dangerous ideology to be built. Celebrating our inclusion onto the totalitarian U.N. Security Council, our government and media are malicious in their brainwashing efforts against Catholics, Protestants, our shared Christian doctrine and our sovereignty as a nation of Gaelic people.

Ach táimid ag suíogh timpeall tábla i bhfad níos tábhachtaí cheana féin.

The word Wikileaks shows up 209 times in the 448 page Mueller report, with most of it's use surrounding the largely redacted sections ('HARM TO ONGOING MATTER'). Well it is high time a full scale disclosure of this truth in the interests of **International Security** is made.

They killed Jesus Christ for telling the truth and History has repeated itself. If the whole World doesn't find out about these Biblical revelations in time not all will be able to be saved.

Recently I said a prayer and asked for a clear sign to tell me to act on this information. The very next day General Michael Flynn of the United States Military published an open letter encouraging Christians to act, noting that *"prayers were not enough"*.

General Flynn features in the video I uploaded to the internet in order to signal to those who knew about all of this that it was not going away [Link #54]. It did not last long on most of the various non mainstream file sharing sites however it contains the footage of the time I shared the .zip file mentioned previously with the Youtuber. Following that section is the narration of much of the evidence documented in this letter.

I thought proving the fundamental truth in this letter by opening the files publicly was going to be the greatest hurdle and maybe we would need to resort to an ancient 32bit microprocessor like the Motorola 68K or an FPGA. However, recently there was a large leak of Intel processors backdoor architecture [Link #55] and hackers have come into possession of Bill Gate's Microsoft Windows XP source code and are actively working to remove it's spyware [Link #56].

This is large scale industrial espionage and warfare at work and this is the plan in action. As Q repeatedly says *"Sometimes you can't just tell the public the truth you have to show them."*

Now, compromised governments all around the World are using the virus which the WHO recently admitted is no more dangerous than the common flu to strip us of our fundamental human rights, it is the end goal for them, completely totalitarianism [Links #57,58]. They have made this job incredibly difficult, limiting my mobility and yours to spread this information exceptionally difficult. We are effectively living under house arrest once the clock strikes midnight tonight.

They have kept the schools open mind you and are planning on vaccinating all the children aged 2-12 in the state with a product so new long term studies could not possibly have occurred.

Robert Pyre notes several reasons why the Irish should not vaccinate their children with this in his open letter [Link #59]. Children are not susceptible are children to dying from the flu so why now? **The fact that it contains a genetically modified live virus that even the adults on this island are not subjected to and is being forced upon our children during a “pandemic” is reason and evidence enough that this is hugely malicious.**

If I didn't come forward we might be looking at an attempted sterilisation of our nation. Bill Gate's and the British Zionists dream, you only need to look at the population graphs of the British and Irish Isles during the Irish “famine” documenting the genocide upon us when they were exporting our food at the end of a gunpoint and this is all proven in Chris Fogarty's excellent book “Ireland 1845-1850: The perfect Holocaust and who kept it “perfect.”

I have sent this letter to 100 different people in Ireland today, some of whom are heavy hitters and some are complete wildcards. The chosen politicians have a duty to disclose it's contents under parliamentary privilege and the Computer Scientists can quickly attest to the plausibility or even further. Few Journalists have received this letter because their industry is so heavily compromised it would be a waste of paper.

As Q remains anonymous for now, so too must I because of the aforementioned disgracefully politically incorrect show I put on †. The Israeli's actually notified me of their possession of that audio/video when their Intelligence agency Facebook leaked that they had a backdoor in Whatsapp, a grievous privacy violation. That stunt I pulled(while it may be lucrative for me) would be enough to distract from this intelligence dump. If you so wish to unmask my identity feel free to ask the US Homeland Security, their President Donald Trump or General Michael Flynn themselves.

When Donald Trump recently was asked about this plan to expose the pedophile-satanists he replied: “*Is that a bad thing?*” [Link #60]

YOU SIMPLY HAVE TO ASK THEM TO VERIFY ALL OF THIS.

“The truth will SHOCK the World.” - Q

This is the whole truth and nothing but the truth so help me God.

God save Ireland.

(Assange used a simple book cipher to encrypt the insurance files, think ‘1984’ at the top of this letter, note how it is incorrect on the top of the ‘Annotated Blockchain’ also and how he rubbed it in their faces twice too documented in the video.)

Will these bottom of the barrel dregs of society atop their false sense of security keep their heads? The magic 8-ball says "No".

Please broadcast, share & spread this entire letter to the entire island and beyond. It is time to bring this story to it's conclusion. I will upload this letter in pdf format onto the BSV blockchain along with the list of people I sent it to on Sunday at 3pm IST it shouldn't be hard to find but will serve a greater purpose too.
